Vision says stock levels have been increased for the summer peak for its new **TM-WB Motorized Whiteboard Mount**.

Launched at ISE, the TM-WB has a 1.5m telescopic boom and can move the whiteboard and projector up and down 420mm.

It has adjustable whiteboard arms and can accommodate heavy large-format touch-panels.

Vision offers two variations.

The TM-WB is wall mounted; the weight of the assembly is transferred to the ground by two legs. The TM-WBP is portable; it includes a portable stand, and the boom included with this version can swivel 90° to wheel through doors.
