Logitech announces the Create Backlit Keyboard Case-- an update on the first iPad Pro
 keyboard case from the company
featuring the addition of backlighting as well as connectivity via Smart Connector.

Compatible with the 9.7-inch iPad Pro, the Keyboard Case combines both protective case with
a keyboard and integrated Apple Pencil holder. Use of the 3-pronged Smart Connector means
the keyboard automatically powers and pairs with the iPad Pro when put in typing position, with
no additional pairing required.

The actual keyboard has an edge-to-edge layout, mechanical scissor keys with 1.4mm travel
and a row of iOS shortcut keys on the top. Meanwhile the case comes in "tightly woven
premium fabric" for protection against bumps and scratches.

The Create Backlit Keyboard Case is available now.
