---

Case and accessory maker Pen & Quill announces the Leather Apple Pencil Grip-- a self-descriptive means for users to get a better hold of the Apple stylus while working on the iPad Pro.

The grip comes in 2 pieces. One is put on the bottom to provide the actual holding grip, while the other is put towards the top to provide a clip and Lightning cap holder. Construction is in full-grade American leather, and is designed to age and break with age, making each grip unique.

"This is truly one of those Apple Pencil accessories you never knew you needed until you see it in action. No more hunting for lost lightning caps, that pesky charging cap stays put, even when plugged in," Pen & Quill says. "No more rolling away from you when you set it down or storage difficulties, the custom pen clip keeps your Apple Pencil in place on the table and in the pocket. And no more slippery fingers, the leather grip provides a sturdy tactile feel while letting you be as precise as you want."

The Leather Apple Pencil Grip ships from April 2017 in Chestnut, Whiskey and Galloper black colours.
