Turtle Beach launches a pair of headsets aimed at gamer customers at E3 2018-- the Stealth 300 and Recon 200, both wired (via 3.5mm jack) devices described as "perfectly suited" for games such as Fortnite.

"We've seen unprecedented industry growth this year in the headset market, with Turtle Beach outpacing that industry growth by nearly 38% because we deliver the high-quality headsets gamers want and need to be successful in popular Battle Royale games like Fortnite and PUBG, as well as all genres," the company says. "Gamers demand superior audio and comfort no matter their level of play, and that's what we bring to the table with a variety of products to suit every type of gamer."

The Stealth 300 is a wired version of the 2017 Stealth 600 headset. It offers a metal-reinforced headband and 50mm drivers inside ear cups packed with memory foam for more comfort. Support for Windows Sonic for Headphones and Dolby Atmos is included, together with a choice of four EQ presets and battery life reaching up to 30 hours on a single charge.

Meanwhile the Recon 200 has the same flip-up-to-mute mic as the Stealth 200, if with 40mm drivers and support for Windows Sonic for Headphones and Dolby Atmos. Also included are a metal-reinforced headband, memory foam ear cups and 12 hour batter life.

The Stealth 300 headset ships from July 2018, with the Recon 200 to follow sometime on Q3 2018.
