

Amped Wireless Intros RTA15 Router

Written by Marco Attard
17 July 2013

Amped Wireless launches the RTA15, a high power 700mW dual-band 802.11ac wifi router with HD/4K media streaming and online gaming support from multiple simultaneous users.

It carries three high-gain 5dBi antennas and 10 high-power amplifiers, the largest amount in an Amped Wireless product yet-- two 2.4GHz, four 5.0GHz and four low noise.

Other features include an "advanced" internal processor, five ethernet ports, a USB port for file sharing and Wifi Analytic Tool Apps with options for guest networks, adjustable wifi coverage, parental security and IPv6 internet connections.
