

ITdistri launches the **first IT distribution guide in Maghreb...**

The Maghreb guide is available **in French or English** as a 100-page PDF file from over 3500 IT resellers in the 3 main French-speaking Maghreb countries.

It has data on around 202 local and international distributors, semi-distributors, brokers, traders and VADs working in the region.

The guide is also available directly through **ITdistri** or its press partners.

"...Some vendors cover Maghreb only from foreign countries. But it is often difficult to identify the distributors. This guide is there to help them," **ITdistri** founder Alain Godet says.
