

The Difference in DistributionSM

Tech Data extends its distribution agreement with Logitech to bring the latter's PC and tablet peripherals to resellers in more European countries, specifically Germany, Austria, Poland and Czech Republic.

The distie already covers Logitech products in the UK, Netherlands, Belgium, France, Italy, Spain, Portugal, Sweden, Finland, Denmark, Norway and Switzerland.

"Logitech's products are a reference point in the marketplace for innovation and quality, covering solutions for mobile, digital home, gaming, music, PC and business categories," Tech Data says. "We are really looking forward to leveraging the strength of our sales organization across Europe to support the growth of their business throughout the reseller community."
