

G.SKILL Announces Ripjaws Memory Kit

Written by Marco Attard
14 January 2016

Customers wanting high-performance memory might be interested in the G.SKILL Ripjaws-- a DDR4 3000MHz CL14 128GB memory kit consisting of 8X 16GB memory modules.

Designed for use with the Intel X99 platform, the Ripjaws is the fastest DDR4 128GB 1.35V memory kit according to the company. It offers 3000MHz "extreme speed" with CL14-14-14-34 low CAS latency, making it ideal for professional workstations used on content creation, 3D rendering or scientific applications.

The G.SKILL RipJaws should be available by end January 2016.
