

HP Adds Touchscreen to Chromebook 11

Written by Marco Attard
01 July 2016

HP prepares for the upcoming update allowing Chrome OS to run Android apps with the Chromebook 11 G5, a touchscreen-equipped notebook running on the cloud-based OS.

An update of the original non-touchscreen Chromebook 11, the G5 features a slimmer chassis with narrower bezels, an 11.6-inch 1366x768 resolution display, 2/4GB of RAM, 16/32GB of local storage and a battery the company claims provides up to 12.5 hours of use on a single charge.

Connectivity comes through x2 USB 3.1 ports, x1 HDMI 1.4 port, wifi, Bluetooth 4.2, microSDXC card reader and a headphone jack.

The Chromebook 11 G5 is available to select HP partners from July 2016 before general retail availability come October.
