Dell launches four new models of the Inspiron 17 5000 laptops-- all 17.3-inch models featuring the latest AMD processors, the Ryzen 5 and 3 with onboard Vega graphics.

Two of the laptops carry the AMD Ryzen 5 2500U APU with Vega 8 graphics, while the remaining two feature the Ryzen 3 2200U with Vega 3 graphics. All feature the same 17.3-inch 1920 x 1080 LED-backlit display, a platinum silver finish and connectivity via x2 USB 3.1 ports, x1 USB 2.0 port, x1 HDMI 1.4b interface and SD card reader. Also included are a DVD optical drive, 802.11ac dual-band wifi and a 42WH 3-cell battery.

Memory and storage configurations differ according to model. The Ryzen 3 versions offer 8/12GB DDR4-2400 RAM and a 1TB HDD. On the other hand the Ryzen 5 models offer 16GB DDR4-2400 RAM and a 2TB HDD. None of the models include SSD storage.
