

Lenovo announces not one, but two Windows 10 tablets with detachable keyboards-- the Yoga Duet 7i and the IdeaPad Duet 3i, both featuring a companion stylus accessory and LTE support.

The more premium offering of the two is the Yoga Duet 7i, the first Yoga device shipped with a detachable Bluetooth 5.0 keyboard. It features a 13.3-inch IPS 2K touchscreen and is powered by up to a 10th Gen i7 Intel Core CPU and an Intel Iris Plus GPU. Also included are up to 16GB DDR4 RAM, up to 1TB SSD storage, a battery promising 10.8 hours of use on a single charge, Dolby audio and Dolby Vision support.

Lenovo offers stylus input for the Yoga Duet 7i with the E-Color Pen, a rechargeable pen with a built-in sensor allowing users to pick colours from real-life objects by simply touching it with the pen tip. In turn, users can apply the real-life colour to popular design apps, such as Adobe Photoshop, InDesign and Illustrator.

Meanwhile the IdeaPad Duet 3i is a smaller device with 10.3-inch HD IPS display. Available in graphite gray, it carries an Intel Pentium processor and integrated graphics, and includes a battery powering up to 7 hours of use on a single charge. It is also fairly light at 0.86kg, and includes x2 USB-C ports as well as a detachable Bluetooth 5.0 keyboard. Stylus support comes through optional Lenovo Digital Pen.

The Yoga Duet 7i starts shipping from June 2020, with the IdeaPad Duet 3i to follow on July.
