---

AMD launches the Radeon HD 6970M's successor-- the HD 6990M GPU, saying it's the fast single mobile graphics processor on the market.

Designed for gaming, it carries AMD's CrossFireX and EyeFinity technologies, together with DirectX 11 and Stereo 3D support, with AMD claiming it beats Nvidia's offerings at a number of game benchmarks.

The processor also improves on video playback and internet browser performance via App Acceleration technology.

The HD 6990M will be available in a number Alienware machines, as well as Clevo offerings.
