HP is the next vendor to take on the Google cloud-based OS with the Pavilion 14 Chromebook, a 14-inch number similar to the Samsung Chromebook and the Acer C7.

It carries a 1366 x 768 resolution display, 1.1GHz Intel Celeron 847 CPU, 2GB RAM and 16GB of built-in storage. Google also includes 100GB of free online storage for 2 years.

Connectivity options include HDMI, x3 USB, ethernet port and SD reader, while the battery provides up to 4 hours and 15 minutes of power.

The Pavilion 14 Chromebook is available now.
