

Toshiba Intros WT310 Windows 8 Pro Tablet

Written by Marco Attard
02 May 2013

Toshiba goes for the more business-savvy customer with the WT310-- a Windows 8 Pro tablet with an 11.6-inch 1920x1080 display, Intel Core processor and "DigitiserPen" stylus.

Supposedly optimised for business use, the tablet features a DigitizerPen stylus able to turn hand-written scrawls into editable documents, as well as SSD storage, HDMI-out, SD card slot, USB 3.0 port, wifi connectivity (WiDi-compatible), Bluetooth 4.0 and optional HSPA+/LTE radios.

Pre-installed utilities include Trusted Platform Module, Intel Active Management technology and Anti-Theft software.

The company does not detail further on specifications, but does add it will soon offer an optional cradle featuring additional USB and HDMI ports.

Available in steel-gray "resilient plastic coating," the WT310 should start shipping from Q2 2013.
