Promate launches the **lumiTab**, the world's first Android tablet with an built-in projector.

Using its one-button projection system, all the customer has to do is push the button and point the lumiTab to view their tablet screen on an up to 100-inch projected display.

Powered by **DLP technology**, the tablet delivers 35 lumens and WVGA resolution.

The tablet runs on Android 4.2 (Jelly Bean) and has 1GB of RAM.

lumiTab is equipped with Google Mobile apps and services (Gmail, Google Maps, Google Talk, Google Search and Youtube) as well as Micro USB, Mini HDMI, twin (2-megapixel each) front and back cameras, Micro SD card reader, Bluetooth 4.0 and 16GB flash storage.
