

Huawei's Call-Making Tablet

Written by Marco Attard
26 June 2013

Huawei plans to roll tablet, smartphone and entertainment centre into a single device with the MediaPad 7 Vogue-- a 7-inch tablet with "a built-in receiver for direct calling capabilities that remove the need for headphones."

That sounds rather fine, until you remember a 7-inch device might not be the most comfortable (or non-silly looking) to put against one's face...

Otherwise the tablet sounds like most other Android 4.1 tablets, with a quad-core 1.2GHz processor, 16-core GPU, 1024x600 display, a battery promising 20 hours of continuous calling and a variety of pre-loaded apps (such as Facebook, YouTube, GPS, email and word processing) inside an aluminium unibody 9.5mm thick.

"Building on the popularity of the Huawei MediaPad series, we've created a new tablet that caters to fashionistas, technology seekers, entertainment junkies, and people who simply expect more from their technology," the company continues.

The MediaPad 7 Vogue will be available from June 2013 in either black or white, with other markets "to follow."
