Chinese tablet maker Chuwi announces the Hi13, a 13.5-inch Windows-powered hybrid device one can safely describe as a Microsoft Surface rival

The Hi13 features a 13.5-inch 3000 x 2000 resolution touchscreen, and is powered by an Intel Celeron N3450 CPU with 4GB RAM and 64GB eMMC storage (expandable to 128GB via microSD slot). It handles stylus input via HiPen H3 stylus, while a detachable keyboard turns it into a notebook.

Connectivity comes through USB-C, micro HDMI and two full-size USB ports. Also included are 5MP rear-/2MP front-facing cameras and a 10000mAh battery with 24W fast charging support.

The Hi13 is available from 20 February 2017.
