

Sony Looks to Entertain With Xperia XA2 Plus

Written by Marco Attard
12 July 2018

The mid-range Xperia XA2 Plus smartphone is "designed to entertain," Sony says-- specifically through a 6-inch 18:9 ratio "Full HD+" display and High-Resolution Audio technology.

As an update of the XA2, the XA2 Plus offers improved internals with a Snapdragon 630 processor, 4/6GB RAM, 32/64GB internal storage, 23MP rear-/8MP front-facing cameras and a 3580mAh battery. As for further entertainment-friendly features, the fact the handset retains the humble headphone jack should prove a relief to at least some customers.

The OS of choice is Android 8.0, and the phone also includes a fingerprint sensor in the rear.

The Xperia XA2 Plus ships from August 2018 in a choice of silver, black, gold and green colours.
