AOC reveals its take on the large IPS monitor-- the 27-inch i2757fh, with a 2mm bezel the company describes as "borderless."

It handles resolutions of up to 1920 x 1080 with a 50000000:1 dynamic contrast ratio, 5ms response time, x2 HDMI ports, wide viewing angles and built-in speakers.

The package also includes a multifunctional detachable stand with 3 usage modes-- photo frame (without a base), standard stand or height-adjustable stand.

An Eco Mode provides 5 optimised display settings (text, internet, game, movie, sport) and an Off Timer shuts down the monitor automatically if required.
