28 April 2016

The Acer curved monitor portfolio more options with the Predator Z1-- a series of 3 widescreen LCD displays available in 27-, 30- and 31.5-inch sizes.

All models offer 1920 x 1080 resolution with the exception of the 30-inch model, which comes in 2560 x 1080 resolution. The monitor curve reaches 1800R, while the vertical alignment panels promise better contrast and less backlight bleed than similar IPS displays.

When it comes to refresh rates, the 27- and 31.5-inch models support 144Hz, a figure 30.5-inch model boosts to 200Hz. All models feature built-in G-Sync support, making them ideal for customers using Nvidia hardware.

Connectivity comes through HDMI and DisplayPort. Also included is a 5-port USB 3.0 hub built into the bezels and 7W DTS Sound speakers. An interesting premium feature is an ambient light sensor allowing automatic adjustment of backlight intensity according to room conditions.

The Predator Z1 monitors ship from June 2016.
