

LG releases the 38WK95C, an ultrawide 37.5-inch monitor complete with 21:9 3840x1600 resolution curved IPS display, HDR10 support, 99% sRGB colour reproduction and a 3-sided borderless design.

First seen at CES 2018, the monitor offers a grey-to-grey response time of 5ms and a 75MHz refresh rate with AMD FreeSync support. Brightness reaches 300 cd/m<sup>2</sup>, while colour depth reproduction is limited by the 10-bit (8-bit+FRC) panel. A variety of picture modes for different content are built-in, such as Custom, HDR Effect, Reader, Photo, Cinema, Dark Room1/2, Colour Weakness, FPS1 Game/FPS2 Game, RTS Game and Custom (Game) modes for Non-HDR content.

For the viewing of HDR content LG offers HDR Vivid, HDR Cinema, HDR Game, and HDR Standard modes. Connectivity comes through HDMI 2.0, DisplayPort 1.2 and USB-C ports. Also included are dual 10W speakers, headphone jack and x2 USB 3.0 ports.
