Acer's C20 pico-projector is easy to carry around - it's the size of a smartphone.

The projector connects to either laptop, mobile phone or camcorder via USB or HDMI, and has an integrated SDHC card reader.

Projection sizes vary from 5" up to 66", with 2000:1 contrast ratio and WVGA resolution in 16:9 format. The device combines DLP and RGB LED technologies, which Acer says offer a lamp lifetime of up to 20000 hours.

Speakers are also built in the projector.
