Toshiba unveils its take on the USB monitor, with a tablet-style portable format.

The USB Mobile LCD monitor has a 14" screen, with a 1366 x 768 resolution, while a single USB cable handles both power and data. It comes complete with a protective case, which can also act as a stand.

Being small enough to fit in most laptop bags and only 1" thick, it appears to be ideal for customers in need of extra screen space for photography work any sort of multitasking work.
