

OK, another example of where American geek culture is headed: **The Starry Night™ Sleep Technology Bed** .

Leggett & Platt brought this pioneering combination of technology and bedding to create an environment that the sleepy geek finds intelligent, intuitive and comfortable.

Starry Night™ is the first bed in the world with:

- • Anti-snore technology
- • Dual programmable temperature control from 68 to 117 degrees Fahrenheit
- • Sleep Diagnostic Center; monitors body movement and breathing pattern
- • Internet connectivity
- • Wireless RF remote via Microsoft's Media Center
- • iPod docking station
- • life|ware™ Connected

And to all, good night!
