

Notebook Battery Shortage

Written by Bob Snyder
26 March 2008

Dell, Asus and HP say there's a shortage of laptop batteries, partly because of a recent fire at LG Chem, second biggest Korean battery maker. The fire has driven PC makers back to other makers including Sony (remember world's largest product recall of tales of exploding batteries?) LG Chem expects the Ochang plant to start production again in three months. Go [LG Chem](#)
