

Acer reveals its back-to-school portfolio at a "Touch More Connected" press event, one complete with All-in-One (AIO) PCs, tablets, notebooks, hybrids and even a wearable device.

The first devices seen come from the AIO PC selection-- the premium Aspire U5-620 and the budget-conscious Aspire Z3-615. The U5-620 features a 23-inch 10-point touchscreen users can lay-flat or tilt with a single touch, and is powered by 4th generation Intel Core CPUs and optional GeForce GTX graphics.

It also carries up to 1TB of hybrid storage, 16GB RAM and Skype-enhancing features such as a front-facing dual-array microphone, front-facing "hi-fi" speakers and a 1080p webcam.

Meanwhile the Z3-615 is the more basic option, with an adjustable IPS display and 4th generation Intel Core CPU within a sleek metallic stand.

As for notebooks, Acer offers the Aspire V 11 (touch) and E 11 11.6-inch notebooks together with the Aspire E 14 (14-inch) and E 15 (15-inch) models, all with Intel and AMD CPUs and casing in several different colours.

Acer Intros PCs, Tablets, Wearable
