Dell-owned Alienware launches the Aurora Ryzen Edition PCs-- mid-tower desktops systems featuring AMD processors, a first from the company in over a decade, in a number of different configurations.

The Aurora Ryzen edition desktops come in the latest mid-size Alienware chassis featuring

futuristic Legend stylings complete with, of course, addressable RGB LED lighting. Internal configurations include different AMD Ryzen 3000-series CPUs supporting the PCIe 4.0 interface, a variety of AMD (up to Radeon VII) or Nvidia (up to GeForce RTX 2080 Ti) GPUs and a number of memory and storage options.

For instance, the lowest-end machine features a 6-core Ryzen 5 3500 CPU with Radeon RX 5700 graphics, 8GB DDR4 RAM, 1TB HDD and 850W PSU, while the most advanced builds include a 16-core Ryzen 9 3950X processor, together with up 32GB DDR4 RAM and a 2TB SSD + 2TB HDD storage combo.

The Aurora Ryzen Edition Alienware PCs arrive in Europe sometime in H1 2020.
