Gelid Cools Sandy Bridges

Written by Marco Attard

Gelid Solutions launches its 1U cooler for Sandy Bridge CPUs, the Slim Silence iPlus.

Designed to fit most Intel sockets (including 775, 1156, and 1155), the 28mm high cooler supports CPU TDP of up to 82W. It carries what Gelid say is a high performance heatpipe, copper plate and a frameless silent fan.

The fan carries Gelid's PWM (Pulse Width Modulation) control to ensure silent operation and only accelerating fan speeds when necessary.
