Adata Intros External HDD "Puzzle"

Written by Marco Attard

The Adata DashDrive HV610 looks a bit like a puzzle-- or rather, it is a USB 3.0 external HDD with a slide-out cover with interlocking shiny and matte puzzle piece lines.

The cover "locks" into the the pattern on the drive. It is available in a variety of colours and also acts as a means of holding the USB cable when not in use.

The drive itself comes in 2 colours (white or black) with either 500GB, 750GB or 1TB of storage. The USB 3.0 interface, while backwards compatible with USB 2.0, reduces data transfer times by up to 70% according to Adata.
