

Toshiba Q Series SSDs Go Pro

Written by Marco Attard
16 October 2013

Customers wanting to upgrade their PC storage with an SSD option can now get Q Series Pro-- a Toshiba upgrade kit designed for user-upgradeable laptops available in 3 different capacities.

Compatible with ultrabooks and standard-size laptops with a 9.5mm drive bays (via included mounting spacer), the SATA 3.0 drives feature 554MB/s average sequential read speeds and 512MB/s average sequential write speeds.

Toshiba also includes NTI Echo software for help with data migration.

The drives should be available by end October 2013 in 128, 256 and 512GB capacities.
