Kingston launches the DataTraveler microDuo 3.0 and the UHS-I 90R/45W microSDHC/SDXC card-- two storage solutions ideal for use with both PCs and mobile devices.

The DataTraveler microDuo 3.0 adds storage to OTG-enabled devices, and features both standard USB 3.0 and micro USB connectors. It comes in 16, 32 and 64GB capacities, and can also be used with any USB On-The-Go compatible device to transfer data without need of a PC.

Meanwhile the microSDHC/SDXC UHS-1 Class 10 card (in 16, 32 and 64GB) provides 90MB/s read and 45MB/s write speeds, making it ideal for HD video, 3D video and real-time broadcast applications.

Both DataTraveler microDuo 3.0 and the microSDHC/SDXC UHS-1 Class 10 card are available now.
