

Patriot Intros Dual-Sided Flash Drive

Written by Marco Attard
30 April 2015

Patriot launches the a dual-sided USB type-C/type-A flash drive featuring a USB-C connector on one end and a standard USB 3.0 connector on the other for seamless data transfers between traditional and USB-C devices.

“As many MacBook users rely heavily on external storage options, we wanted to be at the forefront with a product that will cater to these consumers,” the company says. “As a leading manufacturer of USB and flash memory, we want to offer solutions for our customers that are easy-to-use and provide seamless experiences across all their devices.”

Construction is in polished metal, and storage comes in either 32 or 64GB capacities. The drive should be available from June 2015.
