

Sandberg Presents USB 3.0 Hard Disk Clone Cable

Written by Marco Attard
25 February 2016

Sandberg suggests an accessory ideal for customers buying HDDs or SSDs-- the USB 3.0 Hard Disk Clone Cable, a hardware and software combination promising easy transfer of data from an old storage device to a new one.

The cable features a SATA connector on one end and a USB 3.0 port (making it backwards compatible with USB 2.0 and 1.1) on the other. Through the included Apricorn Cloning Software it not only clones everything from the built-in drive, it creates smaller copies, making it ideal for users switching to SSD storage.

It supports all SATA 2.5-inch HDDs and SSDs of any capacity, and is compatible with all versions of Windows starting from 7 upwards.

The USB 3.0 Hard Disk Clone Cable is available now.
