

AVG Launches New SMB Product

Written by Marco Attard
12 October 2010

AVG's new business security products offer protection to small and medium sized businesses with monitoring of all business aspects, from online transactions and email communications to customer data handling.

2 products are available - AVG Internet Security 2011 Business edition provides online threat protection and AVG Anti-Virus 2011 Business Edition adds network protection.

Both are based on AVG's People Powered Protection design model, incorporating feedback from over 110 million users.

The company says the new security software is designed to be easy to administrate as well as powerful.
