

USA: 10 billion Videos Viewed Online in Feb.

Written by Bob Snyder

17 April 2008

Good thing February is a short month.

comScore releases Feb. '08 data showing U.S. internet users viewed more than 10 billion online videos during the month, a 66% gain vs. February 2007 and a 3% gain over Jan. '08 (despite Feb. being two days shorter).
