

HP Refreshes Envy Portfolio

Written by Marco Attard
20 March 2019

The HP World Partner Forum sees the company reveal a refresh of the Envy laptop portfolio complete with 13-, 15- and 17-inch models featuring longer-life batteries and a choice of Intel or AMD processors.

The 2019 Envy selection features 4 models-- the Envy 13, Envy x360 13, Envy x360 15 and Envy 17. As the name might suggest, the Envy x360 13 and 15 feature a 360-degree hinge allowing users to flip the display around for use as a tablet, while the Envy 13 and 17 are regular notebooks.

The Envy 13 carries a 1980 x 1080 resolution display together with 8th generation Intel Core processor and a battery HP claims powers up to 19 hours of use on a single charge. Meanwhile the Envy x360 13 features an 2nd generation AMD Ryzen processor and promises up to 14.5 hours of battery life. The Envy x360 15 offers a choice of either AMD or Intel Core processor, as well as up to 13 hours battery life and an optional 1920 x 1080 resolution AMOLED display.

The highest-end model on offer is the Envy 17, with additional GeForce MX250 graphics and even a DVD drive. Further specifications include 12GB RAM and 512GB of storage, as well as an 8th generation Intel Core processor and a 1980 x 1080 resolution display.

The Intel-powered Envy laptops include support for Alexa for voice control capabilities, and all models feature a webcam privacy switch. Located at the side of the machine, it allows users to disconnect the webcam with a simple press. As for connectivity, all include multiple USB ports and a single USB-C port.
