

AOC Presents Agon AG353UCG Ultra-Wide Curved Gaming Monitor

Written by Alice Marshall
21 February 2020

AOC claims to have a display that "ticks all the gamers' boxes"-- the Agon AG353UCG, a 35-inch 3440 x 1440 resolution curved ultra-wide monitor featuring a 200Hz refresh rate and 2ms gray-to-gray (GtG) response time.

An followup to the 2018 Agon AG352UCG6, the AG353UCG carries a VA quantum dot panel the company claims can reproduce 90% DCI-P3 colour coverage at 1000 nit peak brightness with VESA DisplayHDR 1000 and a 2500:1 contrast ratio. 512 local dimming zones allow for a wide dynamic range. Display curvature is at a 1800R radius, while the resolution makes it a curved 21:9 ratio UWQHD display.

As mentioned above, the AG353UCG has a 2ms response time and a refresh rate reaching 200Hz. It is VRR compatible for smooth, tear-free gaming, and also features Nvidia G-Sync Ultimate certification. Connectivity comes through DisplayPort 1.4 and HDMI 2.0, plus a USB hub with four USB 3.1 ports. Stereo 8W speakers provide sound, and mic in, line in and headphone out connectors are also included. The monitor sits on an metal stand allowing for 120mm height adjustments, 32-degree swivel and -5-21.5-degree tilt. It is also compatible with
